👤 About Me

An organized and hard-working employee looking to join the company as a developer.

I'm currently doing **E&ICT IIT Roorkee: Advanced Certificate Program in Full Stack Software Development** certification.

Looking to take advantage of my skills in code development, and the brief knowledge I have acquired of Information Security to provide the best to the company.

I have worked as Information Security Engineer in Infosys where I have conducted various security awareness sessions with more than 100 people as well as other Business Security related work. During the training in Infosys, I was among the top performer of the batch.

💼 Experience

Information Security Engineer
01/2019 – 06/2020

Infosys Ltd.
Bengaluru

- Conducted more than 10 security awareness sessions for the accounts, post a security incident with an average attendance of 100 people
- Developed a static intranet portal for the department using HTML, CSS and JavaScript
- Provided consultation and answers to the client's RFI/RFP associated with Information Security
- Monitored Information Security compliance of the designated accounts
- Reviewed the Master Service Agreements from the Information Security standpoint

Training

Hewlett-Packard Education Services
Patna

HP Summer Training in Java

🎓 Education

B. Tech in Computer Science & Engineering
2012 – 2016

Jodhpur Institute of Engineering & Technology
66.91%

🖥 Personal Projects

Employee Management
03/2022 – 04/2022

The project Employee Management - Spring Boot and Spring Security. This is a Spring Boot REST API application along with Spring Security developed for E&ICT IIT Roorkee: Advanced Certificate Program in Full Stack Software Development certification.

Customer Relationship Management
03/2022 – 03/2022

The project Customer Relationship Management. This is a Spring Boot application that aims to create a Customer Management Web App. This application was developed for E&ICT IIT Roorkee: Advanced Certificate Program in Full Stack Software Development certification.

URL Validator   09/2021 – 09/2021

URL Validator is a Spring Boot Web Application that checks whether a URL exists or not. If the URL exists then it shows the number of times it was searched. If a URL doesn't exist it checks for the parent URL. If none exists then it shows the error.

My Recipes App   12/2020 – 02/2021

The project My Recipes App is a Spring Web Application, wherein you can add and view recipes. This project was developed while undergoing an online course called Spring Framework 5: Beginner to Guru.
